

AlphaGenome Services Additional Terms of Service

Use of the AlphaGenome Services is subject to these AlphaGenome Services Additional Terms of Service in addition to:

- for Google API and AlphaGenome Atlas API: the [Google APIs Terms of Service](#).
- for AlphaGenome Atlas Non-API Features: the [Google Terms of Service](#).

Key things to know

1. The AlphaGenome Services are **only** available for use by individuals and non-commercial organizations (universities, non-profit organizations and research institutes, educational and government bodies), or for journalism.
2. You **must not** use the AlphaGenome Services or outputs (with the exception of the AVI Score):
 - a. in connection with **any commercial activities, including research on behalf of commercial organizations**; or
 - b. to **train machine learning models** or related technology for predicting the effects of genetic variants similar to AlphaGenome.
 - c. for **clinical purposes** or rely on them for medical or other professional advice.
3. Your individual AlphaGenome Services credentials are personal and **must not** be published or shared, even within your organization.
4. You **can publish, share and adapt** output in accordance with the Terms, including the requirement to provide clear notice that (with the exception of the AVI Score) use is subject to [AlphaGenome Output Terms of Use](#) and of any modifications you make.

Besides our terms, we also publish a [Privacy Policy](#). Although it's not part of our terms, we encourage you to read it to better understand how you can update, manage, export, and delete your information. Notwithstanding the "*Exporting & deleting your information*" section of our [Privacy Policy](#), if you would like to update, manage, export or delete your information related to AlphaGenome Services, please contact AlphaGenome@google.com.

Last Modified: September 8, 2026

By using Google's AlphaGenome Atlas (as defined below) or [AlphaGenome API](#) (collectively, the "**AlphaGenome Services**"), you agree to be bound by these AlphaGenome Services additional terms of service ("**Additional Terms**"). These Additional Terms apply in addition to

the [Google APIs Terms of Service](#) (the "**API Terms**") to any use of the AlphaGenome Service that invokes an API, including the AlphaGenome Atlas API or Google's API. These Additional Terms also apply in addition to the [Google Terms of Service](#) (the "**Google Terms of Service**") to all non-API features of AlphaGenome Atlas including pre-computed datasets ("**AlphaGenome Atlas Non-API Features**"). Together, such API Terms, Google Terms of Service and these Additional Terms are referred to herein as the "**Terms**", in each case: (a) as modified from time to time in accordance with the Terms, and (b) between you and (i) if you are from a country in the European Economic Area or Switzerland, Google Ireland Limited, or (ii) otherwise, Google LLC. "**AlphaGenome Atlas**" comprises the AlphaGenome Atlas API and the AlphaGenome Atlas Non-API Features.

Terms that are not defined in these Additional Terms have the meanings given in the [API Terms](#) or the [Google Terms of Service](#), as applicable. Any system or application through which you use or into which you embed the Google API or AlphaGenome Atlas API is an "API Client" under the [API Terms](#).

When we say "**you**", we mean the individual or organization using an AlphaGenome Service and all related information, including (a) any model output, AVI Scores, other pre-computed scores, or pre-computed datasets and related information provided by an AlphaGenome Service ("**Output**"), and (b) any visual representations, computational predictions, descriptions, modifications, copies, or adaptations that are substantially derived from Output ("**Derivatives**") (together, the "**AlphaGenome Assets**"). When we say "**we**", "**us**" or "**Google**", we mean the entities that belong to the Google group of companies, which means Google LLC and its affiliates.

If these Additional Terms conflict with the API Terms or the [Google Terms of Service](#), these Additional Terms will govern for the use of AlphaGenome Services. If the API Terms conflict with the [Google Terms of Service](#), the API Terms will govern solely for the use of the [AlphaGenome API](#) and the AlphaGenome Atlas API.

Account and Registration

In addition to Section 1 "Account and Registration" of the [API Terms](#) and the "Your Google Account" section in the [Google Terms of Service](#), you may only access and use the AlphaGenome Services for individual use, journalism, or use for, or on behalf of, a non-commercial organization (i.e., a university, non-profit organization or research institute, or educational or government body). The AlphaGenome Services aren't available for any commercial entity, even if conducting non-commercial work. In using AlphaGenome Services on behalf of an organization, you confirm you are authorized either explicitly or implicitly to enter, and are entering, into the Terms as an employee on behalf of, or otherwise on behalf of, your organization.

Subject to your compliance with the Terms, you may access, use and modify the AlphaGenome Assets and distribute Output and Derivatives. We grant you a non-exclusive, royalty-free, revocable, non-transferable and non-sublicensable (except as expressly permitted in these Terms) license to any intellectual property rights we have in the AlphaGenome Assets to the extent necessary for these purposes and for use in accordance with these Terms. In order to verify your access and use of the AlphaGenome Assets, we may from time-to-time ask for additional information from you, including verification of your name, organization, and other identifying information. You will respond promptly, accurately and comprehensively to such requests.

Prohibitions and Confidentiality

In addition to Section 4 "API Prohibitions" of the [API Terms](#), the "Respect others" section in the [Google Terms of Service](#) and any requirements identified in the AlphaGenome Services or related documentation made available to you by Google, you must comply with the use restrictions set out below.

You must not use nor allow others to use the AlphaGenome Services or the AlphaGenome Assets:

1. **Except for Permissive Use Downloadable Artifacts for Commercial and Non-Commercial Use (defined below), on behalf of a commercial organization or in connection with any commercial activities, including research on behalf of commercial organizations.** The only exception is journalism.
 - a. This means that only individuals and non-commercial organizations (universities, non-profit organizations and research institutes, educational and government bodies) may use the AlphaGenome Assets and only for non-commercial purposes (except for the AVI Score, which may be used for commercial purposes). The only exception is journalism which is permitted. The AlphaGenome Assets aren't available for any other types of organization, even if conducting non-commercial work.
 - b. You must not share Output or Derivatives with any commercial organization or use any AlphaGenome Services in a manner that will grant a commercial organization any rights in Output or Derivatives, in each case aside from indirectly via a scientific publication, open source release or to support journalism.
2. **To transmit, store, or process health information subject to United States HIPAA regulations.**
3. **To reverse engineer, disassemble, republish, copy, modify, distribute, transfer, sell, or otherwise grant or permit access to any AlphaGenome Services,** including the underlying data or models (e.g., parameter weights), except to the extent such reverse engineering is allowed by applicable law. This doesn't stop you from using and sharing Output or Derivatives in accordance with the Terms.

4. **Except for Permissive Use Downloadable Artifacts for Commercial and Non-Commercial Use, to train machine learning models or related technology for predicting the effects of genetic variants similar to AlphaGenome.**
5. **Except for Permissive Use Downloadable Artifacts for Commercial and Non-Commercial Use, without providing conspicuous notice that any Output or Derivatives you publish or distribute are provided under and subject to [AlphaGenome Output Terms of Use](#) and of any modifications you make to Output.**
 - a. By way of example, you can do this by sharing a copy of the [AlphaGenome Output Terms of Use](#) and a "Legally Binding Terms of Use" text file that contains the following notice: "By using this information, you agree to AlphaGenome Output Terms of Use found at <https://deepmind.google.com/science/alphagenome/output-terms>".
 - b. If you provide additional or different terms and conditions for use, reproduction or distribution of Output or Derivatives, you must include the "Use Restrictions" section of these Terms as an enforceable provision and provide clear notice to subsequent users that Output or Derivatives are subject to such use restrictions.
6. **To misinform, misrepresent or mislead, including:**
 - a. using AlphaGenome Services on behalf of an organization without telling us when you sign-up or by updating us via your profile page;
 - b. misrepresenting your relationship with us;
 - c. misrepresenting the origin of Output or Derivatives;
 - d. distributing misleading claims of expertise or capability made particularly in sensitive areas (e.g., health); or
 - e. making decisions in domains that affect material or individual rights or well-being (e.g., healthcare).
7. **To perform or facilitate dangerous, illegal or malicious activities, including:**
 - a. publishing or sharing your individual AlphaGenome Services credentials, even within an organization, as these are personal;
 - b. promoting or facilitating the sale of, or providing instructions for synthesizing or accessing, illegal substances, goods or services; or
 - c. attempting to override or circumvent safety filters or intentionally drive the model to act in a manner that contravenes our Terms.
8. **In breach of [Google's Generative AI Prohibited Use Policy](#).**

In these Additional Terms, “**AVI Score**” means the AlphaGenome Variant Impact score which is a single score reflecting variant impact, as further described [here](#). For clarity, the AVI Score Feature Breakdown (defined below) does not form part of AVI Score. “**AVI Score Feature Breakdown**” means the breakdown showing features and inputs used to generate the AVI Score.

Subject to your compliance with and without prejudice to the other provision of these Terms, AVI Scores and other artifacts that are made available for download within the “Permissive Use Downloadable Artifact” section of the AlphaGenome Services website (“**Permissive Use Downloadable Artifacts for Commercial and Non-Commercial Use**”) may be used for commercial use and in connection with any commercial organisations.

Content

As described in the [Google Terms of Service](#) and Section 5 "Content" of the [API Terms](#), your content remains yours. We won't claim ownership in any of your content when you use the AlphaGenome Services. However, you acknowledge that we may generate the same or similar content for others, including Google, and that we reserve all rights to do so. We won't share your content with others except as described in the Terms. For the avoidance of doubt, we won't publish your original content or Output without your approval.

Termination

In addition to Section 8.b "Your Obligations Post-Termination" of the [API Terms](#) and the 'Suspending or terminating your access to Google services' section of the [Google Terms of Service](#), if Google terminates your right to access or use any AlphaGenome Services due to: (a) your failure to fully comply with the Terms, (b) our compliance with a legal requirement or court order, or (c) our belief that your conduct causes harm or liability to a user, third party or Google, you must immediately stop using and delete all copies of the Output and Derivatives in your possession or control, require all third parties (except for scientific journals) that you have shared any Output or Derivatives with to stop using and delete such Output and Derivatives, and are prohibited from using the AlphaGenome Assets, including by submitting another application to use the AlphaGenome Services.

In addition to Section 8.c "*Surviving Provisions*" of the [API Terms](#), the following provisions of these Additional Terms will survive termination of the Terms: "*Content*", "*Termination*", "*Liability for AlphaGenome API*" and "*General Legal Terms*".

Payment

Google does not currently levy a charge for your access and use of the AlphaGenome Services. However, without prejudice to our other rights, Google reserves the right to charge fees for access to the AlphaGenome Services by providing you with at least one month's prior written notice. Where Google introduces fees, your use of the AlphaGenome Services will be subject to payment of the applicable fees and may be subject to additional terms and conditions. If you do not wish to pay the fees, you must stop using the AlphaGenome Services immediately.

Liability for AlphaGenome Services

Nothing in these Terms restricts any rights that cannot be restricted under applicable law or limits Google's responsibilities except as allowed by applicable law. If you are legally exempt from certain responsibilities, including indemnification, then those responsibilities do not apply to you under the Terms.

The AlphaGenome Services include experimental technology and may sometimes provide inaccurate output. Output are predictions with varying levels of confidence and should be interpreted carefully. Use discretion before publishing, or otherwise using Output provided by the AlphaGenome Services.

AlphaGenome Assets are for theoretical modelling only. They are not intended, validated, or approved for clinical use. You should not use AlphaGenome Assets for clinical purposes or rely on them for medical or other professional advice. Any content regarding those topics is provided for informational purposes only and is not a substitute for advice from a qualified professional.

Notwithstanding Section 9.b "*Limitation of Liability*" of the [API Terms](#), where the AlphaGenome Services have been provided to you for free, to the extent permitted by law, Google's total aggregate liability for all claims arising out of or in connection with the Terms or the AlphaGenome Assets, including for its own negligence, is limited to \$500.

General Legal Terms

Given the nature of scientific research, it may take some time for any breach of these Terms to become apparent. To protect you, us, and the AlphaGenome Services, to the extent allowed by applicable law:

1. any legal claims relating to these Terms can be initiated until the later of:
 - a. the cut-off date under applicable law for bringing the legal claim; or
 - b. two years from the date you or Google (as applicable) became aware, or should reasonably have become aware, of the facts giving rise to that claim.
2. you won't argue limitation, time bar, delay, or the like in an attempt to bar an action filed within that time period, and neither will we.

When the [API Terms](#) apply, to the extent that applicable local law prevents certain disputes from being resolved in the courts specified in Section 10.c "General Legal Terms" of the [API Terms](#), you and Google can file those disputes in your local courts. When the [API Terms](#) apply, to the extent that applicable local law prevents your local courts from applying the governing law specified in Section 10.c "General Legal Terms" of the [API Terms](#), these disputes will be governed by the applicable local laws of your country, state, or other place of residence.
